Weakness in Coppers Pronounced Business Extremely Satisfactory in Bonds-Early Wheat Options Decline Sharply-Money Easy-Trade Conditions Indicate Improvement.

New York March 34 - There was little

declines amounted to a quarter of 1 per cent. In the coppers weakness was more problemed, and stocks which moved counter to the general trend were American Telephone and Telegraph and Missouri Pacific, the former deriving strength from the publication of an excellent annual report and the latter from the progress in the selection of a new president and the carry beginning of the work of rehabilitating the company.

Boad Business Satisfactors.

Bond Business Satisfactory.

In bonds, business was satisfactory, ex-tremely satisfactory, as compared with business in stocks. More than \$2,000,000 business in stocks. More than £200,000 changed hands on the stock exchange, and the demand for short term notes continued excellent. The wheat market showed a disposition to disregard recent reports of damage to winter wheat, the early options in particular declining sharpty.

An efficial statement from the Standard Oil Company to the effect that the com-

early options in particular declining charpty. An official statement from the Standar Oil Company to the effect that the company was not considering a reorganization or any change whatever in its methods of business was followed by a decline in the stock to 63, as compared with a price of 68 a few days ago.

There was a dearth of other news of a character to stimulate speculative in terest. Further details were announced in the arrangements for close co-operation between the National Bank of Commerce and other big banks and banking houses had been arranged, that satisfactory progress had been marked, that satisfactory progress had been arranged, that satisfactory progress had been arranged, that satisfactory progress in the femiliar of listing Atchison stock in Paris and that the report of a high in the mesotiations for the Chimese loan was in correct, but none of these matters at tracted more than casual attention.

WALL STREET NEWS WEEKLY REVIEW OF TRADE REALTY AND FINANCE

Dun and Bradstreet Show Conditions Generally Stock Exchange Session Was Improved Throughout the Country.

New York, March 24.—R. G. Dun & Co. to-morrow will say:

"Although reports from the leading trades and different sections vary considerably, and statistical comparisons do not differ materially from last week, and, while individual lines show some variations, business as a whole is quiet. For this the long present advance. It is noticeable that re-entities the leading trade of the present and the property of the state of trade to-morrow will say:

or the whole, continue to indicate a mooderate or the dayance. It is noticeable that relatil trade is generally more satisfactory, and many of the important centers make quite optimistic statements concerning the outlook.

"The remarkable change in the foreign commerce situation by which, in eight months, a balance of trade has been created in favor of the United States of Elisson, 2000 as compared with \$155,000,000 as com New York, March 24.—There was little months, a balance of trace has been exert for dealers in stocks to do except to the make comparisons between the current period of duliness and other similar periods and to wonder if ever business are recitis obtained in Europe by readers and the pearly the beauty believes and the beauty periods and to wonder if ever business would improve and the market become normally active again. It was the dullest day of an exceptionally dull week, with a total turnover of only 1500 feathers abroad of our securities; the substants and price movements for the most part uninteresting and inconsequential. Whatever tendency was shown in the antive stocks was slightly reactionary, but the range at the close showed channess little wider than at the close showed channess little wider than at the close showed gesterday, when the average price of statistical rails closed absolutely unchanged and the average of the industrials varied only a hundredth of 1 per cent.

To-day in most of the active stocks the declines amounted to a quarter of 1 per cent. To-day in most of the active stocks the corresponding week last year."

Sistemon of the decline in price of articles of necessity—these are important gains which must sooner or later work for the business improvement, especially if supplemented by ample crops.

"Commercial failures this week in the little States are 138 against 278 last week, 32 the preceding week, and 27 least week, 33 the preceding week, and 27 least week, 34 the preceding week, and 27 least week, 35 the preceding week, and 27 least week, 36 the preceding week, and 27 least week week.

small skirmish developed other offering of Bank of Washington stock. These shares have been coming into the board for sale for the last two weeks in small lots. The offering yes-terday was at 274, but despite efforts to draw forth a better price the buyer main-tained a uniform bid of 271, at which mark ten shares were sold.

The fact that there has been an additomac consolidated as tends to keep tomac consolidated as tends to keep the price in these securities around par. They are now being offered at 100, with the bid price steady at 20%, but as these bonds are held largely in this community any disposition to make any fair commitments for investment purposes undoubtedly would call for a better price.
